

Mantra (Like Faust)

F.A.U.S.T I'm like Faust, like Faust
To the devil that's how I lost
I'm like Faust, like Faust
Medieval, medieval Faust

I want to be loved by those who don't love me
That's why this had to be
It's not for wisdom but fame
Mephisto takes again

I couldn't watch as the world passed me by
Worn to the bone I was afraid, laid down to die
And die without pride

I got advice to people who don't give a damn
I got advice to people who don't lend a hand
I got advice to children who want to do good
I got advice to bloodsuckers who wish they would

Be brave don't follow and look straight ahead
Keep real and cope with what might be said
Its life not dreams when you get turned down
And pick yourself up when you get knocked to the ground

But who am I to tell you this
It's not me but you who's going to miss
The road to freedom without all this stress
Hardships, damnation and just not one bless
Medieval
