

Utopian

You runners up, you suck it up and grab the cup
We're in this together as a family forever

Don't suck it up, don't suck it up
Suck it up, your time is up

Friends tell me it's only human to fight
But we don't walk on fours and howl through the night
Our eagles have ran away and harm has taken place
But when we fight each other the man wins the race
We've got to learn he will fight to the end
He will offer us life but we must not bend

Our life is our own and not his to give
Look at the world at look at what he did
We could continue watching as the world dies in his hands
Or we could take back Eden, well what's left of it
It's only perfection cause it seems unreachable
Or maybe just impossible

One man pushing for his dreams to come true
Exposes the world and calls it his zoo
The armies arm and invade without regret
If you're alive he hasn't gotten to you yet
Don't call me a madman, comedies your haven
You hide behind your laughter, but your minds like a vagabond
